

CappAero™ Single Channel Pipettes

CappAero™ Single Pipettes are made with the greatest attention to the user comfort and product reliability. They share a great number of unique advantages, such as easily exchangeable adjustable volume knobs, o-rings at the tip base for ultimate tip compatibility, clearly visible color coding, no deformation of the tip base over time, fully autoclavable pipette body, and much more.

Fully
Autoclavable

DoubleSafe
O-rings

CappAero™ Comfort Pipette

The CappAero™ Comfort pipette reduced the thumb workload up to 70% due to the external tip ejector lever, compared to most other manual pipettes. Reduced thumb workload will help alleviate fatigue and strain to the hand.
