

ecotrade™ Pipette Trade-In and Recycling Program

Get rid of your pipette graveyard and get a great discount on the purchase of new Capp brand pipettes. With our ecotrade™ program you help the environment by recycling your pipettes instead of putting them in landfills and receive a \$50-100 discount on premium laboratory pipettes. To take advantage of our ecotrade™ program just completely fill out both pages of this form and return it along with your old pipette(s). Any brand of pipette is eligible for the discount and they do not need to be in any type of working order – we will accept pipettes even in pieces as long as the complete pipette is represented. Please ensure that the pipette(s) have been completely decontaminated for pathogens, toxins and radioactivity.

Once we receive your old pipette(s) that are to be recycled we will send you a confirmation email with the discount code good for the purchase of new Capp pipettes from BioVentures. The \$100 discount is good toward the purchase of ecopipettes and the \$50 discount is good toward the purchase of any other type of Capp pipette – including Capp Multi-channel pipettes and electronic pipettes. The ecotrade™ program is one for one, for example: two returned pipettes equal a \$100 discount off of one ecopipette and a \$100 discount off a second ecopipette, not \$200 off the purchase of one ecopipette.

If you do not want to purchase a new Capp pipette but would like to have your pipettes recycled simply check the box labeled "Recycling Only". You may send BioVentures more than one pipette per box with one ecotrade™ form.
